4-6 weeks for special orders

MONEY SAVING

No hard wiring required, ensuring extensive locked-in savings

Access Options

- RFID Card
- Passcode
- Fingerprint
- Ekey/Phone App
- Mechanical Key

DUSAW Multi-Use Properties

At DUSAW, we are passionate about revolutionizing property management and security. As a leading provider of smart lock technology, we are committed to delivering advanced and innovative security solutions to our customers.

Experience the perfect blend of reliability, innovation, and efficiency with DUSAW locks. Whether your property is multi-family housing, student housing, senior living, Airbnb, office building, government, military, healthcare, universities, or any other use case, DUSAW has you covered.

Take full control and streamline all access capabilities throughout your property. Our system offers numerous ways to customize access according to your specific needs, preferences and to whom you would like to give access to.

Our locks incorporate advanced BLE chip technology, providing exceptional battery life. DUSAW locks operate independently of internet connectivity. For those seeking additional remote management capabilities, integration with a DUSAW Hub is available. Enhance your overall security with the ability to monitor who accessed any entry point and when it was accessed by way of diverse forms of access.

These features make DUSAW an ideal solution for property managers and multi-unit residences, providing a reliable and efficient access control system.

Centralized Management: Easily manage multiple units from a single platform, streamlining access control across the entire property.

Flexible Access Control: Grant and revoke access remotely, making it convenient for property managers to handle tenant turnover and maintenance access.

Audit Trails: Maintain detailed logs of lock activity, enhancing security and accountability.

Remote Access: Allow tenants to access their units via smartphone, reducing the need for physical keys and improving tenant experience. Temporary and scheduled access can also be granted, providing additional flexibility for both tenants and management.

Customizable Access Levels: Set different access permissions for tenants, maintenance staff, and other personnel, ensuring secure and efficient operations.

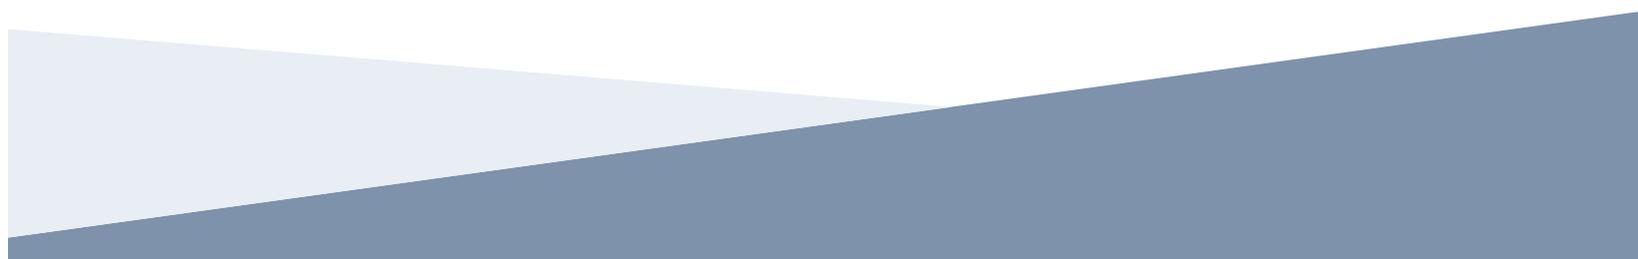

RFID Access: Experience convenience with RFID card or fob access.

Passcode Access: Ensure secure entry with customizable passcodes. Send codes, including one-time codes without the use of internet.

App Access: Effortlessly control and monitor access through our intuitive mobile application. Monitor access remotely without internet connectivity.

Physical Key Access: Utilize traditional key access as backup in case of emergency.

Fingerprint Access: Optional biometric access for enhanced security.

DUSAW Hotel System

In the ever-evolving hospitality industry, guest experience and security are paramount. DUSAW provides cutting edge technology to simplify the management and access of hotel owners, staff and guests. We are dedicated to delivering advanced, flexible, and secure access control solutions tailored to your hotel's diverse needs.

Avoid overwhelming transitions to a new lock system with our user-friendly system. Your staff will quickly adapt to the DUSAW system. The lock pairing process is quick and simple and is done through a phone or tablet.

Streamline your check in and check out processes with DUSAW. Our sleek and compact USB encoder allows for each receptionist to create cards, minimizing guest wait time.

Alternatively, send passcodes to guests in advance to bypass in-person check-in. Assign designated access for each staff account. This ensures additional security and the ability to monitor their performance and efficiency. If any issues arise, you can trace who granted unwarranted access easily.

Experience the convenience of our long-lasting, battery-operated locks. Monitor the battery life from our system and get notified from the lock when the batteries are low. All DUSAW locks feature a physical key override for emergencies. Monitor the battery life and detailed lock opening records accessible via our staff app.

DUSAW locks offer a seamless blend of convenience and safety, enhancing the overall experience for both guests and hotel staff. Our advanced locking systems provide numerous benefits, from streamlined check-in processes to enhanced security features, making them an indispensable asset for all hotels.

Convenience and Flexibility: Guests can check-in and access their rooms using their smartphones or passcodes at any time avoiding the use of physical cards.

Enhanced Security: Features like live action and audit trails, via DUSAW hubs ensure high levels of security.

Integration: Seamless integration with your PMS system for additional convenience.

Retrofitting: DUSAW will give you a lock that best fits the holes in your doors, keeping its lifespan and avoiding major modifications.

Attractive hardware: Increase your ROI with a modern, hassle-free experience that can improve overall guest satisfaction. Give your property the upgraded look that it deserves.

Master Key and Keyed Alike Options: Decrease the amount of key needed for your maintenance team to just one key, reducing the risk of lost or stolen keys and the associated costs of rekeying.

Temporary Access: Create temporary codes in advance for service technicians, avoiding the wait to gain access to necessary areas.

Customizable Access: Guests can be granted access to specific areas like the gym, pool, or conference rooms tailored to their stay and preferences, all with the one card or code. Link common areas and groups of doors, simplifying the staff check-in process.

D101

Material: Aluminum Alloy

Plate Size: L 6.03" x W 2-11/16" (153mm x 68mm)

Access Options: RFID Card, Ekey/Phone App, Passcode, Fingerprint, Mechanical Key

*Also available without fingerprint
